Java (3)

29.3.1 Java: UGC NET CSE | August 2016 | Part 3 | Question: 42

Java uses threads to enable the entire environment to be _____.

- A. Symmetric
- B. Asymmetric
- C. Synchronous
- D. Asynchronous

ugcnetcse-aug2016-paper3 java threads

Answer key

29.3.2 Java: UGC NET CSE | July 2018 | Part 2 | Question: 3

What is the output of the following JAVA program?

```
class simple
{
    public static void main(String[ ] args)
    {
        simple obj = new simple();
        obj.start();
    }
    void start()
    {
        long [ ] P = {3, 4, 5};
        long [ ] Q = method (P);
        System.out.print (P[0] + P[1] +P[2]+"");
        System.out.print (Q[0] + Q[1] + Q[2]);
    }
    long [ ] method (long [ ] R)
    {
        R[1] = 7;
        return R;
    }
} //end of class
```

- A. 12:15
- B. 15:12
- C. 12:12
- D. 15:15

Answer key **29.3.3 Java: UGC NET CSE | June 2019 | Part 2 | Question: 23**

What is the output of the following JAVA program?

```

public class Good {
    private int m;
    public Good (int m) {this.m=m;}
    public Boolean equals (Good n) {return n.m==m;}
    public static void main (string args[]) {
        Good m1 = new Good (22);
        Good m2 = new Good (22);
        Object s1 = new Good (22);
        Object s2 = new Good (22);
        System.out.println(m1.equals(m2));
        System.out.println(s1.equals(s2));
        System.out.println(m1.equals(s2));
        System.out.println(s1.equals(m2));
    }
}

```

- A. True, True, False, False
C. True, True, False, True

- B. True, False, True, False
D. True, False, False, False

Answer key **29.4****Method Overriding (1)****29.4.1 Method Overriding: UGC NET CSE | August 2016 | Part 3 | Question: 38**

Method over-riding can be prevented by using final as a modifier at _____.

- A. The start of the class.
C. The start of derived class.
- B. The start of method declaration.
D. The start of the method declaration in the derived class.

Answer key **29.5****Multi Threaded Programming (1)****29.5.1 Multi Threaded Programming: UGC NET CSE | December 2014 | Part 3 | Question: 37**

Which methods are utilized to control the access to an object in multi-threaded programming ?

- A. Asynchronized methods
C. Serialized methods
- B. Synchronized methods
D. None of the above

Answer key **29.6****Oops (1)****29.6.1 Oops: UGC NET CSE | July 2016 | Part 3 | Question: 40**

Which of the following statements is correct?

- A. Every class containing abstract method must not be declared abstract
B. Abstract class cannot be directly initiated with new operator
C. Abstract class cannot be initiated
D. Abstract class contains definition of implementations

Answer key 

29.7.1 Servlet: UGC NET CSE | June 2014 | Part 3 | Question: 52

Match the following interfaces of Java. Servlet package :

List – I

- a. Servlet config
- b. Servlet Context
- c. Servlet Request
- d. Servlet Response

List – II

- i. Enables Servlets to log events
- ii. Read data from a client
- iii. Write data to a client
- iv. To get initialization parameters

Codes :

- A. a-iii, b-iv, c-ii, d-i
- C. a-ii, b-iii, c-iv, d-i

- B. a-iii, b-ii, c-iv, d-i
- D. a-iv, b-i, c-ii, d-iii

ugcnetjune2014iii java servlet

Answer key

29.8.1 Wrapper Class Object: UGC NET CSE | December 2014 | Part 3 | Question: 39

Converting a primitive type data into its corresponding wrapper class object instance is called

- A. Boxing
- B. Wrapping
- C. Instantiation
- D. Autoboxing

ugcnetcse-dec2014-paper3 java wrapper-class-object
